DEPARTMENT NEWS

CONGRATULATIONS

Dr. Tavis Campbell has just been elected to the Academy of Behavioral Medicine Research. The Academy is the honorary senior scientist society for those whose research exists at the interface of behavior and medicine. Election to this society is reserved for those with national and international behavioral medicine research excellence, and Dr. Campbell now joins the other eminent senior investigators in this field, all of whom have been elected to membership through a highly selective process. This is a distinguished group of scientists, and it’s a sign of Dr. Campbell’s success, and the University’s excellence, that he has become part of it. Please join us in congratulating Dr. Tavis Campbell on this outstanding achievement.

CALL FOR PAPERS

SUBMIT TO CANADIAN PSYCHOLOGY

As you may know, Canadian Psychology is the flagship journal of the Canadian Psychological Association. As its Editor, I would like to encourage you to submit a new, original paper to be considered for publication. Review papers are particularly welcome!

Published in partnership by the Canadian Psychological Association (CPA) and the American Psychological Association (APA), Canadian Psychology has a mandate to present generalist articles in areas of theory, research, and practice that are potentially of interest to a broad cross-section of psychologists. Review papers and other knowledge syntheses are particularly welcome, regardless of the type of review (clinical guidelines, narrative reviews, meta analyses, etc.). Canadian Psychology also publishes original, empirical contributions if the research is of direct relevance to the discipline as a whole (e.g., a survey of psychologists about the future of the discipline). The journal publishes both special issues and regular issues; authors therefore do not need to wait for a special issue before submitting a paper.

Authors accepted for publication in Canadian Psychology benefit from exceptional support, knowledge, and resources provided by the APA Journals family and enjoy worldwide exposure: Every article published in Canadian Psychology is included in PsycINFO® and PsycARTICLES®, the most comprehensive and widely used psychological databases in the world. Through print and electronic access, articles published in Canadian Psychology are available to a global audience of over 3,300 institutions and 60 million potential readers.

Additional information about the journal, guidance for authors, and links to our electronic submissions webpage are available at http://www.apa.org/pubs/journals/cap/index.aspx. Manuscripts should be submitted electronically through the journal's Manuscript Submission Portal.

I hope you will consider submitting your next paper for review by Canadian Psychology.

Cordially,
Martin Drapeau, PhD
Editor, Canadian Psychology

SUBMIT TO YALE REVIEW OF UNDERGRADUATE RESEARCH IN PSYCHOLOGY

We are pleased to announce that The Yale Review of Undergraduate Research in Psychology, a student publication of Yale College, is now accepting submissions from undergraduates for the 2016 edition of our journal.

SUBMISSION DEADLINE: December 20, 2015 by 11:59pm EST

The Yale Review of Undergraduate Research in Psychology is an annual journal that showcases the best and most original research in psychology conducted by undergraduates from around the world. Our goal is to contribute to scientific advancement by encouraging serious, quality research early on. We provide a platform for undergraduate scientists to share their findings, and aim to bring together a community of young psychologists from both the United States and abroad.

Our website can be viewed at http://campuspress.yale.edu/yrurp/
EMPLOYMENT AND VOLUNTEER OPPORTUNITIES

JOB OPPORTUNITY

Lectureship/Senior Lectureship in Cross-cultural Psychology

The School of Psychology is seeking to make a permanent appointment at the Lecturer or Senior Lecturer level (equivalent to Assistant or Associate Professor) in cultural or cross-cultural psychology. The area of specialization within cultural/cross-cultural psychology is open, and may include, but is not limited to: applied, social, developmental, cognitive or organizational psychology; mental health; neuroscience; and research methods. The area of expertise should complement existing areas of strength in the School of Psychology, and preference may be given to areas that fit within the Centre for Applied Cross-cultural Research’s community engagement and research activities on topics pertaining to: 1) Cross-cultural Understanding and International Engagement and 2) Multiculturalism and Social Connectedness.

The successful applicant will have a PhD in Psychology, a strong research and publication record, and experience in teaching at the tertiary level, including the supervision of post-graduate research. A significant contribution to the M.Sc. in Cross-cultural Psychology, supervision of doctoral students and undergraduate teaching in the School are expected.

The School of Psychology, ranked number one for research in New Zealand, hosts the Centre for Applied Cross-cultural Research. The Centre has extensive international research networks and strong relationships with government and voluntary organizations within New Zealand, offering unique research opportunities for early to mid-career academics.

For further information or questions regarding the vacancy please contact Professor Colleen Ward, School of Psychology, at: Colleen.Ward@vuw.ac.nz

Additional information can be found and applications submitted at: http://www.victoria.ac.nz/about/careers/current-vacancies.

Applications close 31 March, 2016.
Graduate study in Applied Social Psychology at the University of Guelph is designed to prepare students for applied research careers in a wide range of settings. Our program is best suited to those students who wish to investigate social processes and problems of significance to the general community and to specific groups, for example, problems in the areas of aging, health, law, inequality, community services, work, minorities, ethnic groups, and gender.

Our program is distinguished from other social psychology programs by the following features:

**Choice of Program Emphasis**

Our program includes a balance of theory, methods, and applications. Students have the flexibility to emphasize one of two broad goals: research/practice (e.g., working in community agencies, government, consulting firms, foundations, and hospitals) or research/academics (i.e., working in universities and colleges).

**Diverse Methods**

Faculty members employ diverse research strategies to answer questions related to social problems and social issues. Both qualitative and quantitative analyses are conducted, using methods that involve community and cross-cultural surveys, archival research, interviews, observation, naturalistic study, program evaluation, and experimental studies.

**Practica and Consulting Experience**

Our graduate students are employed in a number of applied settings where they conduct research, design intervention programs, and take part in consulting work. Practicum placements offer an opportunity for skill-acquisition and refinement, for developing professional contacts, and for applying scientific knowledge to the needs and demands faced by the host settings. Students in our program may also participate in consulting work, for example, at the Centre for Families, Work and Well-Being.

**Admission Requirements:**

- Honours BA or BSc (or equivalent) in Psychology/affiliated field (minimum B+)
- A breadth of psychology courses
- Senior honours thesis project or senior research project equivalent
- Intention to proceed to the PhD
- Submission of a Graduate Record Exam (GRE) both general and subject (psychology)

To discuss the Applied Social Psychology program, contact: Saba Safdar, safdar@psy.uoguelph.ca
